Office Action Summary	Application No. 10/812,586	Applicant(s) SRIDHAR ET AL.	
	Examiner Wayne Langel	Art Unit 1754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Terms such as "undesirable" and "undesired" render the scope of the claims vague and indefinite, since it is not clear which components would be desired or undesired. The term "such as" also renders the scope of the claims vague and indefinite, since it is not clear as to whether all of the components in the recited list are required to be present in the industrial solution, or only at least one of them or none of them.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Twardowski et al in view of the article by Yuan et al. ("Application of membrane separation impurity removal process in PAN production") (Abstract only). Twardowski et al disclose a nanofiltration process for reducing the concentration of undesirable compounds in aqueous solutions. The difference between the process disclosed by Twardowski et al, and that recited in applicants' claims, is that Twardowski et al do not disclose that the process should be carried out for purifying sodium thiocyanate solutions. The Abstract of the article by Yuan et al discloses a membrane separation

Art Unit: 1754

process for removing impurities from a sodium thiocyanate solution. It would be obvious from the Yuan et al article to purify sodium thiocyanate solutions according to the process of Twardowski et al. One of ordinary skill in the art would be motivated to do so, since the process of Twardowski et al is directed broadly to the nanofiltration of aqueous salt solutions, and Yuan et al suggest the desirability of purifying sodium thiocyanate solutions by membrane separation.
